

CGM Computer Consulting

INTRODUCTION

Established in 1997, CGM Computer Consulting (CGMCC) provides information technology services to support the business objectives of our clients. CGMCC offers expertise in systems engineering, software development, professional services, training and support. The company has experience providing solutions to federal, state and local government as well commercial sectors.

We strive to build long term relationships based on mutual trust and respect. CGMCC is committed to providing innovative strategic solutions which enable our clients to become more effective and efficient. CGMCC can assume responsibility for the implementation, stabilization and security of your technical environment.

CERTIFICATIONS & REGISTRATIONS INCLUDE

- SBA 8(a) Certification, E-Rate Certification
- CCR / ORCA
- GSA Schedule 70 (Contract # GS-35F-0263T)
- Accepting Government Visa and EDI
- Microsoft, Trend Micro, HP, Tandberg Partners

LIST OF INFORMATION TECHNOLOGY SERVICES

- Software Development
- IT Staffing & IT Training
- Tier I, II, III Help Desk Support
- Secure Content Management
- Network Engineering and Support
- Telecommunications & Audio/Visual
- Professional Services
- Electronic Records Management

INFORMATION TECHNOLOGY SERVICES - (NAICS CODES)

- 541511 - Custom Computer Programming Services (**Primary**)
- 541512 - Computer Systems Design Services
- 541513 - Computer Facilities Management Services
- 541519 - Other Computer Related Services
- 541611 - Administrative Management and General Management Consulting Services
- 541612 - Human Resources and Executive Search Consulting Services
- 541690 - Other Scientific and Technical Consulting Services
- 561310 - Employment Placement Agencies
- 561320 - Temporary Help Services
- 423430 - Computer and Computer Peripheral Equipment and Software Merchant Wholesalers
- 516110 - Internet Publishing and Broadcasting
- 518210 - Data Processing, Hosting, and Related Services
- 518111 - Internet Service Providers
- 518112 - Web Search Portals
- 611420 - Computer Training
- 811212 - Computer and Office Machine Repair and Maintenance

INVITATION

We invite you to talk to our customers and visit our jobs in progress. Our highly skilled professionals will be happy to answer any questions you may have. You will see what we have done, what we are doing, and what we can do for you! Call us today.

Sincerely,
Ken Carter
President/CEO CGM Computer Consulting, Inc.

Past Performance

US Army

Family Communications Program

Previously the Army command units' web sites were static and required a web developer to edit the source code in order to post new items. This process had a very slow turnaround time and required many technical resources to manage. CGM developed of a custom Web Content Management System that gave unit commanders and their staff to ability to communicate real-time information and photo journals while maintaining adherence to Department of Defense, Army, and Fort Jackson Public Affairs Office guidelines for general public release of information. The key functionality is the ability of regular users to easily and seamlessly add and approve new content to the sites, thus improving the communications between soldiers and their loved ones.

SC Archives and History

Share Point Infrastructure

CGM developed a new Online Records Index web application to make it easier for the public to access images of historical records. Implemented a share point infrastructure, .Net architecture and enhanced data security. The design incorporated style sheets and themes to reduce maintenance effort and insure consistency throughout the site making is easier for the staff to update. The web site and database were moved to separate servers to improve security and performance. The SQL statements were converted in compiled stored procedures to reduce site maintenance and improve performance. The site was moved to hardware that has adequate resources to support peak usage periods. Microsoft best practices were adopted to manage the development, testing and deployment of site, updates and maintenance.

US Army Fort Jackson

Moncrief Hospital

CGM is currently working with Moncrief Army Hospital to upgrade their existing data communication networks. This includes replacing all existing data communication cable (cat5e and cat6e) in the hospital and wide area network fiber projects (underground and aerial) to the remote medical clinics and aide stations; Maintenance of the telephone systems and wiring; Evaluation of the wide area network.

Department of Homeland Security

Language Translation Lab

CGM Computer Consulting has provided continuing support for the US Army at Fort Jackson South Carolina. We have provided technicians to support their Interpreter Language Training Operations. Our project managers, network engineers and technicians have knowledge of DOD and DA ADP policies, standards and procurement procedures sufficient to advise leaders of ADP projects on these matters as they relate to computer systems.

South Carolina Department of Juvenile Justice

Juvenile Justice Management System

We have provided resources that converted legacy data, architected and implemented a thin client multi-tier web solution. In only six months, we were able to help architect and implement their system's infrastructure. They now have a seamless, customized management solution that has allowed SC Department of Juvenile Justice's staff in 50 locations across the state to access the JJMS System easily, in a user-friendly manner.

Wilbur Smith

Our in house development team analyzed, designed and developed a custom airport system. The project source code was written in vb.net, asp.net, SQL Server and Java to run on a Windows and Linux operating system. The software developed was part of a larger system that allows airports to track capital improvement projects that will be considered for state and federal funding.

South Carolina Commission For the Blind

CGM migrated from NT Domain to Win2003 Active Directory Domain, migrated from Exchange 5.5 to Exchange 2003. We managed Help Desk by monitoring and expediting duties among other contract employees. We provided Tier 1, 2 and 3 support for all clients of SCCB, provided full network support for SCCB and assistance to the Assistive Technology, Red Cross, and TSD divisions of SCCB. Replaced all DOS based software with Windows, or XML based solutions.
